

datasafe

More Power

Higher Performance

Longer Shelf Life

Less Space

In every way, DATASAFE challenges the limitations of traditional standby power batteries, setting new standards for UPS performance.

Available in four sizes from 83W/cell to 270W/cell, DATASAFE in its distinctive black ABS box extends the range of advanced lead acid batteries from Hawker.

Now you can choose a power source developed specially for UPS and designed to suit your system whatever its size.

From small file server to large main-frame, DATASAFE is more than a match for today's demanding UPS systems.
